

Amendments to the Abstract

Please **add** the following Abstract to this application.

-- The invention relates to a device ~~(15)~~ for preventing illegal exportation of a content protected by a global copy protection system to a local copy protection system. According to the invention, each content liable to be exported contains a unique identifier ~~(CUI)~~ and the device ~~(15)~~ comprises a table ~~(GET)~~ for storing unique identifiers of all contents that have already been exported through said device. The invention also relates to a method for recording a content received by such a device. This method comprises the steps consisting, if the copy is to be made for a local copy protection system, in checking whether the unique identifier ~~(CUI)~~ of said content is contained in the table ~~(GET)~~ of said device; and should said checking be positive, in preventing the recording; and should said checking be negative, in recording the content and storing said unique identifier ~~(CUI)~~ in said table. --
